

This is a beautiful title in English. (8 pages max) (Times New Roman, bold, 20 pts) **If you write all your article in English**

John MEURISSE¹, Madeleine VENTURA^{2*} (First name + Last name -capital-; bold, 12pt)

¹Transfinished and Continuous Exergetics Laboratory (Times New Roman, 11 pts)
Enigma Street – Bletchey Park, Bletchley (UK).

²Fundamental Thermal Metrology Institute
Patton Place – Chicago (IL). (Times New Roman, 11 pts)

*(Corresponding author: madeleine.ventura@ftm-institute.edu)

Abstract - The abstract (in English) should have 6 lines and written in Times New Roman 11pt.

Keywords: Kw1; Kw2; Kw3; Kw4; Kw5. (5 keywords)

NOTE: articles will be available on an USB stick, on the website www.sft.asso.fr and in a W&B printed proceedings book proposed to the collective members or available on order before publication (announcement in the April's Bulletin SFT). Each article will be identified by a DOI and an ISBN.

Nomenclature (11 pt, 2 columns)

<i>A</i>	aspect ratio	<i>T</i>	temperature, K
<i>D</i>	mass diffusivity, m ² .s ⁻¹	<i>Greek symbols</i>	
<i>L</i>	length, m	<i>α</i>	thermal diffusivity, m ² .s ⁻¹
<i>k</i>	unit vector	<i>Index and exponent</i>	
<i>S</i>	exchange area, m ²	<i>w</i>	wall

1. Introduction (First title, 14pt, bold)

The article must be written on a maximum of **8 pages**, without page numbering.

A line break follows the first title. The text must be in Times New Roman, 12pt and a 0.5 cm tabulation is present on the first line.

Two consecutive paragraphs are separated by an interline of 1.5. The rest of the text must use a simple interline and is justified.

1.1. Second level of headings (bold, 12 pt)

Subsections and the associated paragraphs are separated by a break line.

1.1.1. Third level of headings (bold, italic, 12 pt)

References are noted in brackets and numbered in the order of their appearance (e.g. the following sentence shows how to cite a reference: journal [1], book [2], conference [3], PhD thesis [4] and internet site [5]).

2. Equations

Equations must be written in italic, even if they are linear (see equation 1). They must be centered and their number, between brackets, is on the right of the page. (bold police).

$$\rho C_p \frac{\partial T}{\partial t} = \lambda \frac{\partial^2 T}{\partial x^2} \quad (1)$$

3. Tables

Tables must be inserted and cited in the text, and look like the example in Table 1.

	Latent heat h_{lg}	Density ρ	Pressure P_{sat}	Temperature T
	kJ.kg^{-1}	kg.m^{-3}	kPa	K
^4He - liquid	15.6	110.7	169.4	4.8
N_2 - liquid	195.8	795.1	136.7	80

Table 1: *Title of the table (Times New Roman, italic, 11pt)*

4. Figures

They can be grouped altogether at the end of the text, after the bibliography, or be inserted in the text at the best place. It is very important to have clear and readable datas after the 75% reduction, so a minimal size has to be respected. Similarly, contrast of pictures must be sufficient. Concerning the legend, two cases are described hereinafter.

Figure 1: *Title in italic (Times New Roman 11 pts)*

Figure 2 : *One legend (Times New Roman 11 pt)*

Figure 3 : *Another legend (Times New Roman 11 pt)*

5. Conclusion

May the force be with you. We welcome you to the Lion city of Belfort, from the 09th to the 12th of June 2020.
